

## Polling Methodological Note – June 2020

A representative sample of 1,124 adults in Great Britain were interviewed between the 11<sup>th</sup> and 15<sup>th</sup> June 2020. All interviews were conducted as online self-completion. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, working status, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page two.

### Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age and whether reported voting in the 2017 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2017 General Election.

### Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

### Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017<sup>1</sup>). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 40.5% to 46.6%
- Labour Party = 32.4% to 37.5%
- Conservative lead over Labour = 4.3%pts to 13.5%pts

---

## Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

### Gender\* and working status

Source: Annual Population Survey (Jul 2018-Jun 2019)

	<b>Unweighted count</b>	<b>Weighted count</b>
Male working	344	369
Male not working	199	180
Female working	334	329
Female not working	247	246

\*Those reporting an "other" gender are randomly allocated to male or female.

### Gender\* and age

Source: ONS Mid Year-2018 Population Estimates:

	<b>Unweighted count</b>	<b>Weighted count</b>
Male 18-24	55	63
Male 25-34	93	97
Male 35-44	94	89
Male 45-54	106	97
Male 55-69	117	119
Male 70+	78	84
Female 18-24	65	60
Female 25-34	101	96
Female 35-44	89	90
Female 45-54	108	100
Female 55-69	154	125
Female 70+	64	105

\*Those reporting an "other" gender are randomly allocated to male or female.

## Region

Source: ONS Mid Year-2018 Population Estimates:

	<b>Unweighted count</b>	<b>Weighted count</b>
North East England	63	47
North West England	113	127
Yorkshire & Humber	111	95
East Midlands	76	84
West Midlands	116	102
East of England	100	107
London	125	152
South East England	134	158
South West England	104	99
Wales	74	55
Scotland	108	97

## Education by age

Source: Annual Population Survey (Jul 2018-Jun 2019)

	<b>Unweighted count</b>	<b>Weighted count</b>
Aged 18-24 with a degree	33	22
Aged 25-44 with a degree	195	157
Aged 45-69 with a degree	140	119
Other	756	826

## Vote in the 2016 EU referendum\*

Source: EU referendum & ONS Mid Year-2018 Population Estimates

	<b>Unweighted percentage</b>	<b>Weighted percentage</b>
Remain	41%	31%
Leave	40%	33%
Did not vote	18%	36%

\*An imputed response is given for those that prefer not to say who they voted for in the referendum.

## Vote in the 2019 General Election\*

Source: General Election & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
England - Labour	22%	18%
England - Conservative	34%	25%
England - Lib Dem	7%	7%
England - Other	6%	3%
England - No vote	15%	34%
Scotland - Labour	1%	1%
Scotland - Conservative	2%	1%
Scotland - SNP	5%	2%
Scotland - Other	2%	1%
Scotland - No vote	1%	3%
Wales - Labour	2%	1%
Wales - Conservative	2%	1%
Wales - PC	<0.5%	<0.5%
Wales - Other	<0.5%	<0.5%
Wales - No vote	1%	2%

\*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

## Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated <b>Voting Age Population</b> turnout if General Election were to be held tomorrow	83%	61%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2017 general election and immediately after the election.

## Further details

Please contact Luke Taylor [luke.taylor@kantar.com](mailto:luke.taylor@kantar.com) for further details on the methodology used in this polling.

# Polling June 2020 OnLineBus Survey (S6783 - 40312012-24)

Corona5. The NHS is planning to launch a contact-tracing app for mobile phones. Once downloaded, this app would use Bluetooth signals to keep a trace of which other app users people have been in close contact with. This would allow the app to warn users that have been in close proximity to anyone that reports testing positive for coronavirus. How likely or unlikely would you be to use this app?
